

# Mid Weight Colour Pallet 190-200gsm

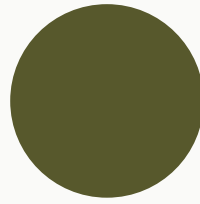

**Combed Cotton** is made by specially treating the cotton fibers before they are spun into yarn. The combing process removes any impurities from the threads making it a firmer tighter knit. The end result is an extremely soft version of cotton which is stronger and shinier fabric with no pilling and holds it's shape and colour.

# Heavy Weight Colour Pallet 300-320gsm

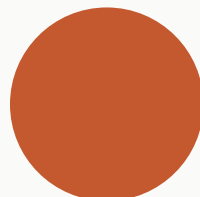

**French Terry** is woven into loops and features soft piles of yarn. Because it is unbrushed it does not have the fuzziness on the inside like fleece. The fabric is specially woven to reduce any impurities such as pilling, making it absorbent, moisture wicking and hold it's shape. Made from 100% cotton it is lighter than most sweatshirts with a good amount of stretch and very comfortable to wear.
